To Whom It May Concern:

ICFX, Inc. is currently contracting Studio Visia, Inc. for their web design services on our netHive.com project. In addition to netHive.com's rich, interactive, Flash-based interface, Studio Visia is also developing the following web based tools:

1. **Hive Phone**- Realtime audio/video internet conferencing tool containing the following features:
   - Live video chat
   - Text chat
   - Audio/Video mail
   - Encrypted conversations
   - Auto re-dial
   - White board
   - Caller ID/ Call waiting
   - Mute
   - Recordable conversations

2. **Nectar Collector**- A tool for gathering, organizing and rating URL's. Features include:
   - Click and drag approach for saving URL's
   - Methods for organizing and categorizing web sites
   - A rating system for web sites
   - The ability to make notes on web sites and e-mail them to friends and business associates
   - The ability to post findings to a public area for others to view and utilize

3. **Meeting Scheduler-** A tool for booking a virtual meeting and creating a 3D conference room in which to hold your meeting by answering the following questions:
   - Who?
   - What?
   - Where
   - When?
   - How?

4. **Instant Messenger-** Send text messages to friends and business associates across the Internet. Contains the ability to:
   - Create an online address book
   - View icons of people with whom you are chatting
   - Save text copies of conversations
   - Disable tool and block senders

Studio Visia, Inc. has continually provided high quality services for all of our Internet endeavours.

Sincerely,

James Ehrlich
CEO
ICFX, Inc.
